About me

I am a **front-end developer** currently residing and studying computer science in London with 2 years of experience in web development. Passionate about information technology and how it is transforming business.

Skills:

Java Script, React, Next.js, SASS/SCSS, Tailwind, Git, JWT, Socket.io, MERN, Node.js, Express, Redux, Zustand, MySQL, MongoDB, Strapi, Framer Motion, Figma, Ubuntu, Trello, Manual testing.

Experience: ~ 2 years

Junior Front-end Developer – Sep 2023 – Jan 2024 (4 months)

- Participated in the development of an online casino website.
- Manual testing, using emulators, and reporting the bugs to Trello.
- Refactoring of components, and redesigning of modal windows and forms.
- Was responsible for adaptive design for different devices and screen sizes and orientations.

Full-stack Chatbot developer – Feb 2020 - Nov 2020 (9 months)

- Created an assistant bot in the Telegram messenger on Node.js using node-telegram-bot-api, which allowed me to automate my small inline business selling disposable e-cigarettes.
- Setting up the MySQL database for product storage.
- Created an admin panel for managing products with all CRUD operations implemented.
- Setting up the Express server, creating an REST-API
- Integrated the Easy Pay online payment system.
  Stack: Express.js, Node.js, HTML, CSS, MySQL, Telegram-API

Chatbot developer – Dec 2019 - Jun 2021 (1 year 7 months)

- While studying at the university, I participated in the creation of an online chatbot timetable in the Telegram messenger for all university students.
- Creating the logic of user interaction via a keyboard interface

- Fetching data from API
- Implementation of the search for the lesson schedule by date, its presentation in an easy-to-read format, text formatting
- Implementation of authentication for students and lecturers
- Maintaining the code and bug-fixing
